

CLASSIFICATION OF STORM WATER HOT SPOTS

The following land uses and activities are deemed storm water hot spots:

- vehicle salvage yards and recycling facilities
- vehicle service and maintenance facilities
- vehicle and equipment cleaning facilities
- fleet storage areas (bus, truck, etc.)
- industrial sites (included on SIC code list)
- marinas (service and maintenance)
- public works storage areas
- facilities that generate or store hazardous waste materials
- commercial container nursery
- other land uses and activities as designated by an appropriate review authority

Storm water pollution prevention plan implementation may be required for these land uses or activities under the EPA NPDES storm water program.
